1. Introduction

Please consider these instructions as guidelines for preparation of Camera-ready Papers (CRP). The CRP would be acceptable as long as it is formatted reasonably close to the format being suggested here. It is expected that authors will submit carefully written and proofread material. Spelling and grammatical errors, as well as language usage problems, are not acceptable.

2. Author names

Proceedings will be submitted for indexing in Elsevier Scopus. For proper indexing, citation, or online search, list author' names in the format: LAST NAME, First name, Middle name or initial, e.g., PERSON John D.

Author affiliations need not be repeated for multiple authors of the same affiliation. This template was designed for three authors with two different affiliations.

3. Paper length

Each Author or Student Author registration includes publication of one paper with up to 5 pages in length in the conference proceedings. An additional page fee will apply for over-length papers.

4. Formatting instructions

Text font: Arial or Times New Roman.
Be sure to embed all fonts when making PDF file.
Main text should be aligned to both left and right margin (justified alignment).
Diagrams and photographs must be of high quality and in reasonable size.

4.1. Page numbering

Final page numbers and/or running heads will be inserted by the publisher. Therefore, do not number any pages or reference page numbers or use header/footer in the text. It's okay to use footnotes.

4.1.1. Margins

Select letter size paper (8.5 X 11 inch or 21.59 x 27.94 cm) when preparing your manuscript.

Set top and bottom page margins at 0.7 inch (1.78 cm). Since page numbers and running head will be inserted, top & bottom margins should not be less than 0.7 inch.

Set left and right page margin at 0.5 inch (1.27 cm).

After the Keywords, use two-column format. Columns should have equal width of 3.6 inch (9.14 cm). Leave a 0.3-inch (0.76 cm) space between the two columns in the center of the page.

Use font size (character size) not smaller than size 10 for main text. The text should be prepared with single line spacing.

4.1.2. Figures and Tables

Large figures and tables may span across both columns.

We suggest that you use a text box to insert a graphic. To have non-visible rules on your frame, under "Format" in Text Box Tools, select "Shape outline" and choose "No outline"

5. Conclusion

A conclusion might elaborate on the importance of the work or suggest applications and extensions.

6. Acknowledgement

As applicable.

7. Appendix

Appendix should appear after the acknowledgment.

8. References

Number in square brackets ("[ ]") should cite references to the literature in the main text. List the cited references in numerical order at the very end of your paper (under the heading `References'). Start each referenced paper on a new line (by its number in square brackets).
